

BRAJESH DAS

Software Engineer | Python Backend Developer | Django Developer
Bhubaneswar, Odisha, India | +91-6372517064 | brajeshdas118@gmail.com
[linkedin.com/in/brajesh-das](https://www.linkedin.com/in/brajesh-das) | github.com/brajeshdas117-pixel

PROFESSIONAL SUMMARY

Entry-level Software Engineer skilled in Python, Django, FastAPI, REST APIs, PostgreSQL, and full-stack web development. Strong foundation in DSA, OOP, Git, and database design, with hands-on experience developing scalable and production-ready applications.

TECHNICAL SKILLS

Languages: Python, JavaScript

Frontend: HTML, CSS3, [React.js](#), Tailwind CSS, Vue.js

Frameworks / Backend: Django, Django REST Framework, FastAPI

Databases: PostgreSQL, SQL, Relational Database Design, Database Management System (DBMS)

Tools & Platforms: Git, GitHub, Postman, Vercel, Render

Core Concepts: Data Structures & Algorithms (DSA), Object-Oriented Programming (OOPs), REST API Development, Software Development Life Cycle (SDLC)

EXPERIENCE

Technology Intern

May 2024 – June 2024

PXE, Defence Research and Development Organisation (DRDO), Chandipur, Balasore, Odisha

- Operated, programmed, and calibrated a Photron SA-5 high-speed camera system to capture, log, and analyze high-frequency imaging data for engineering diagnostics.
- Developed and executed an independent thermal-imaging project using infrared (IR) cameras to automate surface temperature distribution tracking, enhancing non-contact thermal analysis precision.
- Conducted systematic experimental testing, automated data acquisition workflows, and led system validation processes using scientific software and instrumentation.

PROJECTS

Smart Tatkal Booking Online System

Vue.js, React.js, Tailwind CSS, Django, PostgreSQL, REST APIs

github.com/brajeshdas117-pixel/tatkalpro-smart-booking-assistant

- Building a high-concurrency full-stack ticket booking automation platform engineered to streamline time-sensitive booking workflows under high-traffic conditions.
- Architecting a robust Django REST Framework backend with PostgreSQL database indexing to safely handle concurrent booking transactions.
- Developing modular frontend interfaces in React.js and Vue.js integrated with REST API endpoints for secure user authentication, state management, and real-time slot checking.

AI-Based Satellite Change Detection

Python, Django, OpenCV, CNN, U-Net, REST APIs

- Engineered a full-stack AI web application using CNN and U-Net deep learning architectures to automate land and surface change visualization from satellite datasets, hitting an 85–90% segmentation accuracy rate.
- Designed and built high-throughput REST APIs in Django to handle secure multi-format image uploads, background model processing, and automated pipeline delivery.
- Optimized backend workflows and database architectures for heavy image asset storage, accelerating retrieval speeds.
- Reduced manual analysis overhead by approximately 30% by writing automated Python image preprocessing and computer vision script layers.

Personal Portfolio Website

HTML5, CSS3, JavaScript, Web3Forms

- Designed, built, and deployed a responsive personal portfolio site featuring a modern dark-gradient layout and custom UI components to demonstrate core projects.
- Coded fluid mobile-first layouts using CSS Flexbox, successfully eliminating cross-device layout and cross-browser rendering bugs.

CERTIFICATIONS

Agentic AI – CSRBOX in collaboration with IBM SkillsBuild

Space Science and Technology Awareness Training – ISRO

Python Fundamentals – Great Learning

EDUCATION

Indira Gandhi Institute of Technology, Sarang, Dhenkanal, Odisha

2022 – 2026

Bachelor of Technology – Electronics and Telecommunication Engineering, **CGPA: 8.26 / 10.0**
